Mathematics Education Research Journal

Volume 18, Number 2, October, 2006

Special Issue

Research in Mathematics Education: Insights from Rasch Measurement

Guest Editors: Rosemary Callingham and Trevor Bond

Editorial

Research in Mathematics Education and Rasch Measurement
Rosemary Callingham and Trevor Bond 1

Articles

Applying the Rasch Rating Scale Model to Gain Insights into Students' Conceptualisation of Quality Mathematics Instruction
Kelly Bradley, Shannon Sampson and Kenneth Royal 11

Surveying Primary Teachers about Compulsory Numeracy Testing: Combining Factor Analysis with Rasch Analysis
Peter Grimbeek and Steven Nisbet 27

A Longitudinal Study of Student Understanding of Chance and Data
Jane Watson, Ben Kelly and John Izard 40

Easier Analysis and Better Reporting: Modelling Ordinal Data in Mathematics Education Research
Brian Doig and Susie Groves 56

A Case of the Inapplicability of the Rasch Model: Mapping Conceptual Learning.
Kaye Stacey and Vicki Steinle 77

Modelling Mathematics Problem Solving Item Responses Using a Multidimensional IRT Model
Margaret Wu and Raymond Adams 93
