

## *Errata*

---

Some small factual errors crept into Kay Owens' article "The work of Glendon Lean on the Counting Systems of Papua New Guinea and Oceania" in the previous issue of *Mathematics Education Research Journal*:

- In Table 1 (p. 51), under the 4-cycle system type, the distribution "Enga dialects" should appear opposite the variation "Special name for each cycle".
- In Table 3 (p. 54), 72 should be  $36 \times 2$ , not  $36 \times 3$ .
- On p. 68, line 6, the name of the second researcher should read Francis Kari and not Francis Purari.
