

Contents

Preface	3
MERGA Reviewers.....	4
KEYNOTES	
Examining Historical Pedagogies Towards Opening Spaces for Teaching all Mathematics Learners in Culturally Responsive Ways	11
<i>Robin Averill</i>	
Looking for Structure: Moving Out of the Realm of Computation to Explore the Nature of the Operations	28
<i>Deborah Schifter</i>	
PRACTICAL IMPLICATIONS AWARD	
From Research to Practice: The Case of Mathematical Reasoning	40
<i>Dianne Siemon, Rosemary Callingham, Lorraine Day, Marj Horne, Rebecca Seah, Max Stephens, Jane Watson</i>	
SYMPOSIUM	
Stimulating Proportional Reasoning through Engaging Contexts.....	50
<i>Shelley Dole, Ann Downton, Jill Cheeseman, Carly Sawatzki, Merrilyn Goos, Annette Hilton, Geoff Hilton, Kerry Giumelli, Barbara McHugh</i>	
Multiplicative Thinking: Enhancing the Capacity of Teachers to Teach and Students to Learn	67
<i>Chris Hurst, Chris Linsell, Marilyn Holmes, Bilinda Offen, Naomi Ingram</i>	
CHOOSEMATHS – an Australian Approach to Increasing Participation of Women in Mathematics	84
<i>Inge Koch, Ning Li, Gilah Leder</i>	
Young Children’s Transition to Mathematical Drawing	97
<i>Jennifer Way, Sarah Ferguson, Joanne Mulligan, Amy MacDonald, Jill Cheeseman, Andrea McDonough, Steve Murphy</i>	
RESEARCH PAPERS	
Preparedness to teach: The perspective of Saudi female pre-service mathematics teachers	114
<i>Fatimah Alsaleh, Glenda Anthony</i>	
Dialogic Practices in the Mathematics Classroom	122
<i>Catherine Attard, Christine Edwards-Groves, Peter Grootenboer</i>	
The R in the ELR Process: Reflection and the Emotions of Pre-Service Teachers. A Case Study ...	130
<i>Taryn Axelsen, Linda Galligan, Geoff Woolcott</i>	
Beginning teachers learning to teach mathematics through problem-solving	138
<i>Judy Bailey</i>	
Using Technology in Mathematics: Professional Development for Teachers	146
<i>Isaac Benning, Chris Linsell, Naomi Ingram</i>	

Identifying Practices that Promote Engagement with Mathematics Among Students from Disadvantaged Backgrounds	154
<i>Anne Bennison, Merrilyn Goos, Dominika Bielinski</i>	
Pre-Service Teachers' Difficulties with Problem Solving	162
<i>Adrian Berenger</i>	
Changes in Students' Mathematical Discourse When Describing a Square	170
<i>Adrian Berenger</i>	
What can be learned from teachers assessing mathematical reasoning: A case study	178
<i>Leicha A. Bragg, Sandra Herbert</i>	
Conspiracy in senior school mathematics	186
<i>Paul Brown</i>	
Using apps for teaching and learning mathematics: A socio-technological assemblage	194
<i>Nigel Calder, Carol Murphy</i>	
Exploring mathematical fluency: teachers' conceptions and descriptions of students	202
<i>Katherin Cartwright</i>	
Teachers' Perceptions of Obstacles to Incorporating a Problem Solving Style of Mathematics into their Teaching	210
<i>Jill Cheeseman</i>	
"Plot 1 is All Spread Out and Plot 2 is All Squished Together": Exemplifying Statistical Variation with Young Students	218
<i>Helen Chick, Jane M. Watson, Noleine Fitzallen</i>	
Solution of word problems by Malaysian students: Insights from analysis of representations	226
<i>Mohan Chinnappan, Munirah Ghazali</i>	
Orchestrating Mathematics Lessons: Beyond the Use of a Single Rich Task	234
<i>Ban Heng Choy, Jaguthsing Dindyal</i>	
An argument to engage really young children in mathematics	242
<i>Audrey Cooke</i>	
Verification and Validation: What do we mean?	250
<i>Jennifer Czocher, Gloria Stillman, Jill Brown</i>	
Different worlds: Looking deeply at context in the sustainability of PD for collaborative problem-solving mathematics	258
<i>Lisa Darragh</i>	
Fluency with number facts – Responding to the Australian Curriculum: Mathematics	266
<i>Shelley Dole, Peter Carmichael, Catherine Thiele, Jenny Simpson, Christine O'Toole</i>	
Pilot Study on the Impact of In Situ Spaced Professional Learning on Teachers' Mathematical Knowledge of Multiplicative Thinking	274
<i>Ann Downton, Kerry Giumelli, Barbara McHugh, Tammy Roosen, Nadine Meredith, Geraldine Caleta, Paul Stenning</i>	
Opening classroom practice to challenge: The role of trust in mathematics teachers' collaborative inquiry involving co-teaching	282
<i>Raewyn Eden</i>	

Senior Secondary Probability Curriculum: What has changed?	290
<i>Heather Ernst</i>	
A Comparison of STEM and non-STEM Teachers' Confidence in and Attitudes towards Numeracy	298
<i>Elizabeth Ferme</i>	
The explicitness of teaching in guided inquiry	306
<i>Dr Kym Fry, Judith Hillman</i>	
Generating Ideas for Numeracy Tasks across the Curriculum	314
<i>Vince Geiger</i>	
The practice of using NAPLAN numeracy test results: A review of the literature	322
<i>Seyum Getenet, Melissa Fanshawe</i>	
Making Mathematics Accessible for All: A Classroom Inquiry	330
<i>Bronwyn Gibbs, Roberta Hunter</i>	
Zooming-in on Decimals	337
<i>Amelia Gorman, Jennifer Way</i>	
Unexpected Outcomes of a Family Mathematics Story-Time Program	345
<i>Mellony Graven, Robyn Jorgensen</i>	
How do Students Create Algorithms? Exploring a Group's Attempt to Maximise Happiness	353
<i>John Griffith Moala</i>	
Disciplinary Literacy in the Mathematics Classroom	361
<i>Gail Hager</i>	
Maintaining Productive Patterns of Teacher-Student Interactions in Mathematics Classrooms	369
<i>Sara Haghighi Siahgorabi</i>	
The Distinction Between Mathematics and Spatial Reasoning in Assessment: Do STEM Educators and Cognitive Psychologists Agree?	376
<i>Danielle Harris, Tom Lowrie</i>	
What do Culturally Diverse Students in New Zealand Value Most for their Mathematics Learning?	384
<i>Julia L Hill</i>	
Readiness to Teach Secondary Mathematics: A Study of Pre-Service Mathematics Teachers' Self-Perceptions	392
<i>Gregory Hine, Thuan Thai</i>	
Free-Response Tasks in Primary Mathematics: A Window on Students' Thinking	400
<i>Jodie Hunter, Ian Jones</i>	
Using a Contextual Pāsifika Patterning Task to Support Generalisation	408
<i>Jodie Hunter, Jodie Miller</i>	
Preparing for the Final Examination in Abstract Algebra: Student Perspectives and Modus Operandi	416
<i>Marios Ioannou</i>	
The Role of Executive Function and Visual-Spatial Working Memory in the Development of Mathematics Skill	424
<i>Siti Baizura Jamil, Munirah Ghazali</i>	

Improvising in the Primary Mathematics Classroom	431
<i>Dan Jazby</i>	
Speaking Spatially: Implications for Remote Indigenous Learners	439
<i>Robyn Jorgensen, Tom Lowrie</i>	
Effectiveness of Applying Conceptual Change Approaches in Challenging Mathematics Tasks for Low-Performing Students	447
<i>Tierney Kennedy</i>	
Issues of Equity in a Mathematical Inquiry Classroom	455
<i>Christopher King</i>	
What Can We Learn about Students' Mathematical Understanding from their Writing?	463
<i>Igor' Kontorovich</i>	
Designing Data Collection Instruments to Research Engagement in Mathematics	471
<i>Alexandra Laird, Peter Grootenboer</i>	
The Five Question Approach: Disrupting the Linear Approach to Mathematics Teaching	479
<i>John Ley, Catherine Attard, Kathryn Holmes</i>	
Insights into a Year 4 Student's Spatial Reasoning and Conceptual Knowledge of Rectangular Prisms	487
<i>Sharyn Livy, Ann Downton, Simone Reinhold, Susanne Wöller</i>	
Proposed Structural Refinements to the Interconnected Model of Teacher Professional Growth	495
<i>Laurinda Lomas</i>	
Developing a Rubric for Assessing Mathematical Reasoning: A Design-Based Research Study in Primary Classrooms	503
<i>Esther Loong, Colleen Vale, Wanty Widjaja, Sandra Herbert, Leicha A. Bragg, Aylie Davidson</i>	
Variations on a Theme: Pre-service Mathematics Teacher Reflections Using an Affect-based Critical Moment Protocol	511
<i>Margaret Marshman, Linda Galligan, Taryn Axelsen, Geoff Woolcott, Robert Whannell</i>	
The Beliefs about Mathematics, its Teaching and Learning of those Involved in Secondary Mathematics Pre-Service Teacher Education	519
<i>Margaret Marshman, Merrilyn Goos</i>	
Engaging Pre-Service Non-Specialist Teachers in Teaching Mathematics Using Embodied Technology Tools	527
<i>Sarah Matthews, Marie Boden, Jana Visnovska</i>	
Noticing Mathematical Pattern and Structure Embodied in Young Children's Play	535
<i>Catherine McCluskey, Joanne Mulligan, Penny Van Bergen</i>	
Experimenting with Reform-Orientated Approaches: Difficulties and Advantages Experienced by Primary Mathematics Teachers	543
<i>Melody McCormick</i>	
Principals' Perceptions and Expectations of Primary Teachers with a Specialisation in Mathematics	551
<i>Heather McMaster, Jennifer Way, Janette Bobis, Kim Beswick</i>	

Defining the Characteristics of Critical Mathematical Thinking	559
<i>Chrissy Monteleone, Paul White, Vince Geiger</i>	
It's More Than the Videos: Examining the Factors That Impact Upon Students' Uptake of the Flipped Classroom Approach in a Senior Secondary Mathematics Classroom	567
<i>Tracey Muir</i>	
Determinants of Success in Learning Mathematics: A Study of Post-Secondary Students in New Zealand	575
<i>Priscilla Murphy</i>	
School location and socio-economic status and patterns of participation and achievement in Year 12 enabling mathematics	583
<i>Steve Murphy</i>	
Examining a teacher's use of multiple representations in the teaching of percentages: A commognitive perspective	591
<i>Chia Su Ngin</i>	
Middle School Pre-Service Teachers' Mathematics Content Knowledge and Mathematical Pedagogy Content Knowledge: Assessing and Relating	599
<i>Stephen Norton</i>	
Mathematics Anxiety: Year 7 and 8 Student Perceptions	607
<i>Lisa O'Keeffe, Bruce White, Debra Panizzon, Katrina Elliott, Alex Semmens</i>	
Investigating Mathematics Students' Motivational Beliefs and Perceptions: An Exploratory Study	615
<i>Claudia Orellana, Tasos Barkatsas</i>	
Characteristics of Spatial Visualisation: Perspectives from Area of Composite Shapes	623
<i>Sitti Patahuddin, Tracy Logan, Ajay Ramful</i>	
Diagram Effective or Diagram Dependent?	631
<i>Catherine Pearn, Max Stephens, Robyn Pierce</i>	
The Effects of Mathematics Anxiety on Primary Students	639
<i>Theodosia Prodromou, Nick Frederiksen</i>	
The experiences of homeschooling parents when teaching mathematics	647
<i>Robyn Reaburn, Janine Roberts</i>	
Examining Nondominant Student and Teacher Agency in a U.S. High School Mathematics Classroom	653
<i>Rachel Restani</i>	
Measuring Mental Computational Fluency With Addition: A Novel Approach	661
<i>James Russo, Sarah Hopkins</i>	
Sense-Making in Mathematics: Towards a Dialogical Framing.....	669
<i>Thorsten Scheiner</i>	
Perceiving and Reasoning about Geometric Objects in the Middle Years	677
<i>Rebecca Seah, Marj Horne</i>	
Contribution to the Development of Self-Regulated Learning Through Merging Music and Mathematics	685
<i>Carolyn Stevenson-Milln</i>	

Preservice Teacher Mathematics Education: Online vs. Blended vs. Face to Face! Is this the whole story?	693
<i>Rebekah Strang, Kevin Larkin</i>	
Aligning Online Mathematical Problem Solving with the Australian Curriculum	701
<i>Duncan Symons, Robyn Pierce</i>	
Participatory Task Science: The reSolve story	709
<i>Kristen Tripet, Ruqiyah Patel, Steve Thornton, Nadia Walker</i>	
The Role of the Story in Enabling Meaningful Mathematical Engagement in the Classroom	724
<i>Jana Visnovska, Jose Luis Cortina, Pamela Vale, Mellony Graven</i>
