Contents

Preface .............................................................................................................................................. 3
MERGA39 Reviewers ...................................................................................................................... 4

KEYNOTES

How Theory-Building Research on Instruction can Support Instructional Improvement: Toward a Modelling Perspective in Secondary Geometry .................................................. 13
   Patricio Herbst

Preamble to the Annual Clements/Foyster Lecture ................................................................. 32

Whither Statistics Education Research? .................................................................................. 33
   Jane Watson

Learning by Leading: Dynamic Mentoring to Support Culturally Responsive Mathematical Inquiry Communities ...................................................................................................................... 59
   Roberta Hunter, Jodie Hunter, Trevor Bills, Zain Thompson

BETH SOUTHWELL PRACTICAL IMPLICATIONS AWARD

Let’s Count: Improving Community Approaches to Early Years Mathematics Learning, Teaching and Dispositions through Noticing, Exploring and Talking about Mathematics ............. 75
   Bob Perry, Ann Gervasoni, Anne Hampshire, Will O’Neill

RESEARCH REPORTS

Young Children’s Drawings in Problem Solving ........................................................................... 86
   Kamariah Abu Bakar, Jennifer Way, Janette Bobis

Assessing Children’s Progress in Taking Intellectual Risks in a Mathematical Inquiry Classroom with a Positive Learning Approach ........................................................................ 94
   Sue Allmond, Jude Hillman, Karen Huntly, Katie Makar, Mia O’Brien

Investigating the Impact of Context on Students’ Performance ............................................. 102
   Felipe Almuna Salgado

Developing a Theoretical Framework for Classifying Levels of Context Use for Mathematical Problems ......................................................................................................................... 110
   Felipe Almuna Salgado

Whither Ability Grouping: Changing the Object of Groupwork ............................................ 118
   Glenda Anthony, Roberta Hunter, Jodie Hunter

Learning at the Boundaries: Collaboration between Mathematicians and Mathematics Educators Within and Across Institutions ......................................................................................................................... 126
   Anne Bennison, Merrilyn Goos

Discerning the Shared Beliefs of Teachers in a Secondary School Mathematics Department .... 134
   Kim Beswick

Opening Up the Profession: Inclusive Messages for Pre-Service Teachers from a Pedagogy Textbook ........................................................................................................................................... 142
   Amber Brass
Constructing Classroom Contexts that Engage Students in the Learning of Mathematics:  A Teacher’s Perspective ................................................................. 150
Raymond Brown, Trevor Redmond

Preparing for the Numeracy Skills Test: Developing a Self-Perception for Success .......... 158
Leni Brown, Lisa O’Keeffe

Teachers’ Use of a Pedagogical Framework for Improvement in Mathematics Teaching: Case Studies from YuMi Deadly Maths ................................................................. 166
Merilyn (Lyn) Carter, Tom Cooper, Robyn Anderson

Large-Scale Professional Development Towards Emancipatory Mathematics:  The Genesis of YuMi Deadly Maths ................................................................. 174
Tom Cooper, Merilyn (Lyn) Carter

The Priorities and Challenges of Primary Teachers’ Knowledge in their Mathematics Planning 182
Aylie Davidson

A rich assessment task as a window into students’ multiplicative reasoning ................. 190
Ann Downton, Vince Wright

The Relevance of Mathematics: Leaders and Teachers as Gatekeeper for Queensland Senior Calculus Mathematics ......................................................................................... 198
Michael Easey, Jim Gleeson

Key Elements of a Good Mathematics Lesson as Seen by Japanese Junior High School Teachers ........................................................................................................ 206
Marlon Ebaeguin, Max Stephens

“Mathematics is just 1 + 1 = 2, what is there to argue about?”: Developing a framework for Argument-Based Mathematical Inquiry ......................................................................................... 214
Jill Fielding-Wells

Interpreting Association from Graphical Displays ..................................................................... 222
Noleine Fitzallen

Numeracy for Learners and Teachers: Evaluation of an MTeach coursework unit at Monash University .......................................................................................................... 230
Helen Forgasz, Jennifer Hall

Numeracy and Australian teachers ............................................................................................. 238
Helen Forgasz, Gilah Leder

Early Childhood Teachers’ integration of ICTs: Intrinsic and Extrinsic Barriers ..................... 246
Jillian Fox, Carmel Diezmann, Janeen Lamb

Teachers as Designers of Effective Numeracy Tasks ............................................................... 254
Vince Geiger

Designing Online Learning for Developing Pre-service Teachers’ Capabilities in Mathematical Modelling and Applications ......................................................................................... 262
Vince Geiger, Liz Date-Huxtable, Rehez Ahlip, Marie Herberstein, D. Heath Jones, E. Julian May, Leanne Rylands, Ian Wright, Joanne Mulligan

Hurdles in Acquiring the Number Word Sequence ..................................................................... 271
Peter Gould

Professional learning in mathematical reasoning: Reflections of a primary teacher .................. 278
Sandra Herbert, Wanty Widjaja, Leicha A. Bragg, Esther Loong, Colleen Vale

Investigating Declining Enrolments in Secondary Mathematics .................................................. 287
Gregory Hine
Collaboration around observation of teaching: Powerful professional learning

Louise Hodgson

Assessing children’s strategy choices to make better decisions about remediation

Sarah Hopkins

Improving the efficiency of problem-solving practice for children with retrieval difficulties

Sarah Hopkins, Celeste de Villiers

A case study on the impact of teacher mathematical knowledge on pedagogical practices

Sally Hughes

Sliding into Multiplicative Thinking: The Power of the ‘Marvellous Multiplier’

Chris Hurst, Derek Hurrell

Assessing Children’s Multiplicative Thinking

Chris Hurst, Derek Hurrell

Commognitive Analysis of Undergraduate Mathematics Students’ Responses in Proving Subgroup’s Non-Emptiness

Marios Ioannou

Investigating the Interconnections between Cognitive, Affective and Pedagogical Issues in the Learning of Group Theory

Marios Ioannou

An Ecological Analysis of Mathematics Teachers’ Noticing

Dan Jazby

Middle Leadership: Critical Variables in Building and Implementing Digital Reforms in Primary Mathematics Education

Robyn Jorgensen, Janeen Lamb, Kevin Larkin

A Collaborative and Reflective Approach to Teaching for Metacognition

Berinderjeet Kaur, Lai-Fong Wong

Staff Development: The Missing Ingredient in teaching Geometry to Year 3 Students

Kevin Larkin, Peter Grootenboer, Peita Lack

Changes in Teachers’ Knowledge and Beliefs about Mathematics and Mathematics Teaching: A Case Study

Laurinda Lomas, Doug Clarke

Sustainable improvements in student mathematics learning and disposition as a result of Prepare 2 Learn intervention

Bernadette Long

Spatial Reasoning Influences Students’ Performance on Mathematics Tasks

Tom Lowrie, Tracy Logan, Ajay Ramful

Early mathematical competencies and later outcomes: Insights from the longitudinal study of Australian children

Amy MacDonald, Colin Carmichael

“I believe the most helpful thing was him skipping over the proof”: Examining PCK in a senior secondary mathematics lesson

Nicole Maher, Helen Chick, Tracey Muir

Improving the Intellectual Quality of Pedagogy in Primary Classrooms through Mathematical Inquiry

Katie Makar
Insights from a financial literacy task designer: The curious case of problem context
Carly Sawatzki ........................................................................................................ 576

High school students’ knowledge of a square as a basis for developing a geometric learning
progression .............................................................................................................. 584
Rebecca Seah, Marj Horne, Adrian Berenger

Understanding Time: A Research Based Framework ........................................ 592
Margaret Thomas, Doug Clarke, Andrea McDonough, Philip Clarkson

Time: Assessing Understanding of Core Ideas .................................................. 600
Margaret Thomas, Andrea McDonough, Philip Clarkson, Doug Clarke

Developing Teachers’ Reasoning about Comparing Distributions: A Cross-Institutional Effort 608
Dung Tran, Hollylynne Lee, Helen Doerr

Quality of Life: Domains for Understanding Maths Anxiety in First Year Pre-service
Teachers through Identity Work ........................................................................... 616
Sue Wilson

Developing mathematical content knowledge for teaching: One preservice teacher and her
planning .................................................................................................................. 624
Susanna Wilson

Visualisation and Analytic Strategies for Anticipating the Folding of Nets ............... 632
Vince Wright

Developing early Place-value Understanding: A Framework for Tens Awareness .......... 640
Jenny Young-Loveridge, Brenda Bicknell

Distribution of high achieving students on NAPLAN across schools: Implications for policy
and teacher training ............................................................................................. 648
Simone Zmood

SYMPOSIA

Teacher actions that encourage students to persist in solving challenging mathematical tasks...
Naomi Ingram, Chris Linsell, Marilyn Holmes, Sharyn Livy, Peter Sullivan ............... 657

Perceptions of Challenging Tasks and Achievement by New Zealand Students .......... 661
Chris Linsell, Marilyn Holmes, Naomi Ingram, Sharyn Livy, Peter Sullivan

A highly capable Year 6 student’s response to a challenging mathematical task ............ 665
Sharyn Livy, Naomi Ingram, Marilyn Holmes, Chris Linsell, Peter Sullivan

The intent and processes of a professional learning initiative seeking to foster discussion around
innovative approaches to teaching ......................................................................... 669
Peter Sullivan, Marilyn Holmes, Naomi Ingram, Chris Linsell, Sharyn Livy,
Melody McCormack

RESEARCH PRESENTATION ABSTRACTS

Maths-myths ........................................................................................................... 674
Andy Begg

Pasifika students’ perceptions of mixed ability grouping in mathematics lessons .......... 674
Trevor Bills, Jodie Hunter, Roberta Hunter

Primary students’ compassionate approach to financial decision-making ................ 675
Levon Blue, Mia O’Brien

SHORT COMMUNICATION ABSTRACTS

Consumer and financial literacy education: Engaging primary teachers and their students in mathematics.................................................................................................................................. 687
Catherine Attard, Matt Thompson

Teaching financial literacy for social justice in mathematic classrooms ......................................................... 687
Levon Blue, Peter Grootenboer

Breaking the Barrier Between Learning and Assessment .................................................................................... 687
Kristen Di Cerbo, Denise Jacobsson

D.A.T.A.: Data, Analysis, Then Action - National Statistics Initiative ......................................................... 688
Peter Howley

How Middle Years Students Create and Utilize Data Models to Estimate Population: A Case Study ............................................................................................................................................. 688
Takashi Kawakami, Kosuke Mineno

A Five Question Approach to Teaching Mathematics ......................................................................................... 689
John Ley

An Exploratory Investigation on the Influence of Mathematical Modelling on Students’ Real-world Problem Solving Skills .................................................................................................................................................. 689
Siew Yee Lim, Hui Yi Ting, Deepa Patel, Linda Shear, Eddie Tay

Using Metaphors, Models and Multi-modalities when Teaching Year 2 Students Part-Part-Whole Relationships: A Fine Grained Analysis ........................................................................................................................................ 690
Paula Mildenhall, Barbara Sherriff

An Application of the Five Processes of Mathematical Thinking to Numeracy Sample Items ... 690
Lisa O’Keeffe, Patrick Johnson

Reconceptualising Curriculum Design to Promote Students’ Conceptual Understanding of Mathematics: A Focus on Fractions ................................................................................................................................. 691
Maria Quigley

An Analysis of Senior Secondary Mathematics Written Examinations with Respect to Calculator Use ........................................................................................................................................ 691
Hazel Tan

The reSolve: Mathematics by Inquiry Protocol .................................................................................................. 692
Steve Thornton

A Study of the Relationship between Conceptions of Mathematics and NAPLAN Numeracy Test Results.................................................................................................................................................. 692
Sven Trenholm, Mohan Chinnappan, Bronwyn Hajek, Helen Ashman, Amie Albrecht

Beliefs about Mathematics and Teaching when Crossing Subject Boundaries to Teach Mathematics............................................................................................................................................. 693
Colleen Vale

Student views on 21st Century Teaching and Learning of Mathematics ............................................................ 693
Bruce White

Secondary student’s perceptions of what is important when they are learning Mathematics ...... 694
Bruce White

Increasing Parental Involvement ......................................................................................................................... 694
Monica Wong, Nicola Cull
